Notice of Public Hearing August 16, 2017

The Board of Directors has set a public hearing for August 16, 2017, at 7:00 pm, at the District Office located at 8930 Placer Road, Redding, CA. At the hearing, the proposed Rate Increases will be described and the public will be given an opportunity to comment. If adopted, the increases will become effective September 1, 2017. A summary of the **PROPOSED RATE ADJUSTMENTS** are listed below. Please review the Notice of Public Hearing that was included with your June statement, or simply view it at www.centervillecsd.org for more details.

Base Rates

Meter Size	Current Residential Rate	Proposed Residential Rate	Current Comm. & Industrial Rate	Proposed Comm. & Industrial Rate	Current Water Availability Charge	Proposed Water Availability Charge
5/8"	\$ 24.50	\$ 25.50				
3/4"	\$ 24.75	\$ 25.75	\$ 24.75	\$ 25.75	\$ 24.75	\$ 25.75
1"	\$ 25.00	\$ 26.00	\$ 25.00	\$ 26.00	\$ 24.75	\$ 25.75
1.5"			\$ 45.00	\$ 46.00		
2"			\$ 85.50	\$ 86.50

Consumption Surcharge per 100 cf:	\$.191	\$.221

The Quality of Your Water...

Having high quality, safe drinking water is important to us all.

To have great water, you need to begin with a great source. Whiskeytown Lake was formed by construction of the Claire A. Hill Dam in 1963, as part of the Trinity River Division Project and Central Valley Project to minimize flooding, provide a source of irrigation and drinking water, and create recreational opportunities. The lake has a capacity of 241,100 acre-feet. Inflow to the reservoir is provided by two main sources: Clear Creek, which drains a majority of the watershed; and the Clear Creek Conduit, which conveys water from Lewiston Lake.

To ensure the best possible quality, the water is tested for many contaminants as required by Federal and State regulations. The District conducts routine tests during the year from our 13 sampling stations located throughout the District. The most frequent is our weekly routine testing. Along with these weekly tests, the District regularly samples three different locations along Muletown Road.

The District also flushes dead-end lines to ensure that the highest quality drinking water is available to our customers. Dead-end flushing is just another method we use to guarantee delivery of the highest quality drinking water to your tap.

Tri-annually the District collects ten samples from customers located throughout the District for Lead and Copper testing. These results are shared in the District's Consumer Confidence Report.

As part of the Environmental Protection Act, the District performs monitoring for Disinfection By-Products once a year. These tests are called TTHM and HAA5 and are included in the Consumer Confidence Report. In addition, water quality samples are taken pursuant to the Unregulated Contaminant Monitoring Regulation (UCMR3).

As required by the State, the District also tests for Asbestos every 9 years. The next scheduled test will take place in August 2019.

For more information please contact the District Office. To view the Consumer Confidence Report, please visit <http://ccrwater.net/centervillecsd-27592> or simply use the link on our website.

The District Office will be closed
Monday,
September 4th.

It's Back to School!

We would like to take this opportunity to remind you that school starts on **Wednesday, August 16, 2017**. Don't forget to be alert to school buses picking up and dropping off children and be on the lookout for those taking advantage of walking or cycling to and from school. Please remember to reduce your speed and be courteous with your driving habits.

SCHEDULED BOARD MEETINGS:

The next scheduled Board of Director's Meeting will be held Wednesday, September 16th at 7:00 pm, at the District Office.

The public is always welcome.

Average Water Usage

Compare the usage on your water bill with the average of the District.

July's Average: 8,500 cubic - feet.
