The Boardroom is Complete!

The Board of Directors held the January 2023 Board Meeting in the newly constructed Boardroom. The vote was unanimous as they directed the District Manager to file the Notice of Completion on the new space. The public is always welcome to attend the monthly Board Meeting held the 3rd Wednesday of each month at 7 pm.

Centerville CSD takes every step to maintain high quality drinking water. One of the most important factors in water quality is the source and its applicable treatment process. Centerville CSD's primary water source is Whiskeytown Lake, which is supplied by Trinity Alp snowmelt.

Water Treatment & Testing

Centerville CSD has a dedicated capacity in the Clear Creek Water Treatment Plant (WTP) which is located just below the Whiskeytown Dam and is operated by the Clear Creek Community Services District. This facility is capable of producing 32 million gallons of water per day. The primary goal of the WTP and its staff is to provide safe, great tasting drinking water for the communities it serves. The WTP utilizes a technology know as "Inline Filtration." Water is drawn from the penstocks at the base of the Whiskeytown Dam and sent to a Chlorination Building. Here the water is dosed with a light chlorine solution for disinfection and a polyaluminium chloride (PAC) chemical. As the water makes its way to the filters, it is dosed with a polymer just ahead of a static mixer. Once the chemicals are mixed together, smaller particles begin to clump together to form larger particles know as "floc". The "floc" is then passed through one of 8 dual media pressure filters. Once water has passed through the filters, it is sent back to the Chlorination Building for another dose of chlorine. This dose is for final disinfection and to provide chlorine residual throughout the distribution system. The chlorine residual is continuously monitored to ensure that the chlorination process is working properly.

Our treatment and distribution systems are regulated by the United States Environmental Protection Agency and the State Water Resources Control Board Division of Drinking Water, under the State and Federal Safe Drinking Water Acts. Centerville CSD's drinking water quality remains in full compliance with all State and Federal regulations.

Centerville CSD collects samples throughout the District to test for contaminants and ensure that we are providing the best possible water to you.

The Centerville Education Foundation's

Annual Art Auction
&
Appreciation Dinner

Saturday, February 4th, 2023 at 6 pm
Win-River Event Center
2100 Redding Rancheria Road

The evening includes dinner, dancing, a live auction of student art pieces, as well as, a dessert and silent auction. The Centerville Education Foundation (CEF) is a non-profit organization that helps fund advanced educational needs for Grant School. 100% of their resources support the Grant School students and teachers. Please join us February 4th at Win River for our annual fundraising event. **Tickets are \$40 at the door**

Volunteers Needed

The Volunteer Fire Company needs volunteers with all types of skills and abilities. Volunteers that have backgrounds in various areas such as general business, accounting, medical, law enforcement, mechanics, construction, computers and fundraising are needed.

Now is the time to challenge yourself, build new skills, and become part of a tight-knit public service force, while feeling the rewards of having contributed to a purpose greater than yourself.

If you, or someone you know, are interested in becoming a volunteer firefighter, please join us on Tuesday night at 6 pm, at the Volunteer Station located at 8930 Placer Road.

Holiday Schedule

The District Office will be closed:
February 13th: Observing Abraham Lincoln's Birthday
February 20th: President's Day

SCHEDULED BOARD MEETINGS:

The next scheduled Board of Director's Meeting will be held Wednesday, February 15, 2023 at 7:00 pm.

The public is always welcome.

Average Water Usage for the month:

Compare the usage on your water bill with the average of the District.

January's Average: 1,500 cubic - feet.
